

Thank you for purchasing the Craven Speed Emergency Brake Handle

Contents:

- Handle
- Zip Tie

Tools Required:

Standard screwdriver

Scissors

1. Remove the silver top to the stock handle by prying with a standard screwdriver.
2. Use the standard screwdriver to pop the plastic around the bottom of the brake boot off.
3. With the top removed, you will have access to the black clip underneath that holds the stock handle on.
4. Use the standard screwdriver to pry up the clip to release the plastic handle from the steel shaft and button.
5. Pull the boot over the handle to expose the tie that keeps it in place.
6. Cut the zip tie off and remove the plastic handle entirely.
7. Slide the Craven Speed Handle in place, and use the 2 mm Allen wrench to secure the setscrew.
8. Use the supplied zip tie to attach the boot to the handle in the same manner as it had been originally.
9. If you choose to use the other two setscrews to secure the handle, then be careful not to obstruct the spring inside the brake.

If you have any questions, difficulties, or suggestions please call Craven Speed, we want to hear you comments! 888-493-7262.
